

CYRUSONE'S INTELLISCALE DESIGN

AI's large volume of data and compute, coupled with unprecedented energy demand, is a departure from traditional data center designs. CyrusOne's Intelliscale Design was engineered specifically to capture these workloads.

ULTRA-HIGH DENSITY

- >2,000 watts ft²
- Single or Multi-story
- Liquid, Air, Hybrid cooling
- Immersion

EFFICIENCY

- Low PUE
- Zero water consumption
- High component utilization
- Build efficiency: size, material, labor

REDUNDANCY OPTIONALITY

- N, N+1, 2N, N+2c

DESIGN FLEXIBILITY USING OUR STANDARD KIT

- Cooling
 - Air
 - Liquid to Chip
 - Cabinet Heat Exchanger
 - Immersion
- Electrical
 - Voltage
 - UPS
 - Generator

ENVIRONMENTALLY CONSCIOUS

- Reduced carbon footprint
- Zero water consumption
- LEED Design
