

CyrusOne has more than 100 global data center locations in the US, Europe and Asia Pacific. In the US, the company has 70+ facilities (built and in development) across 11 states. It has 20+ European facilities across 5 countries, and recently, we expanded in Japan with our first development project. CyrusOne is backed by two of the largest global asset managers at Kohlberg Kravis Roberts and Global Infrastructure Partners. And CyrusOne's facilities host mission critical digital infrastructure supporting approximately 800 customers, spanning from small enterprises to the largest technology companies in the world. The business provides innovative solutions to its customer supporting A.I. adoption, renewable energy, and explosive demand for data center capacity.
